Omni-Flex™

Multi-Use Retractor System

Your Patient.
Your Approach.

Flexibility

Stable retraction that lets you perform surgical procedures the way you prefer. Strong enough for your largest patients. Nimble enough for small-site work. Always easy to use.

The new Omni-Flex™ Retractor System.

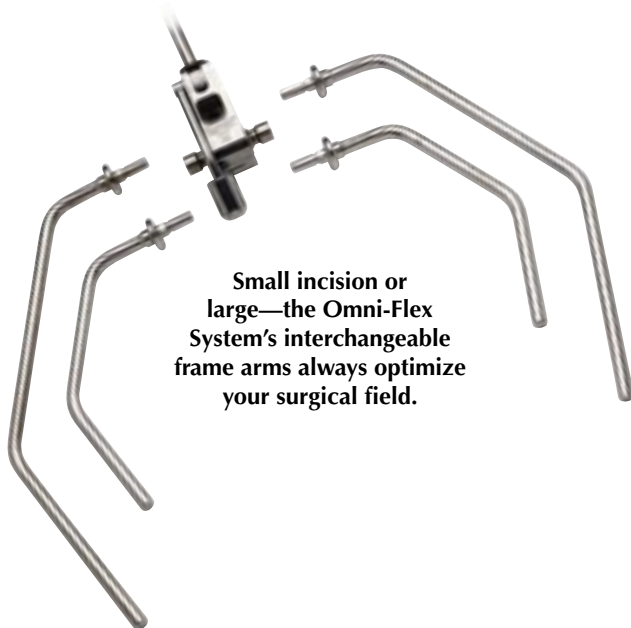

For over 30 years Omni-Tract® Surgical has provided table-mounted retraction technology for surgeons. The Omni-Flex Retractor System continues the low-profile tradition—but now with even faster setup. Clearly the very latest in flexible table-mounted retraction.

Imagine what you could do.

Retract As You Like with Interchangeable WISHBONE® Frame Arms

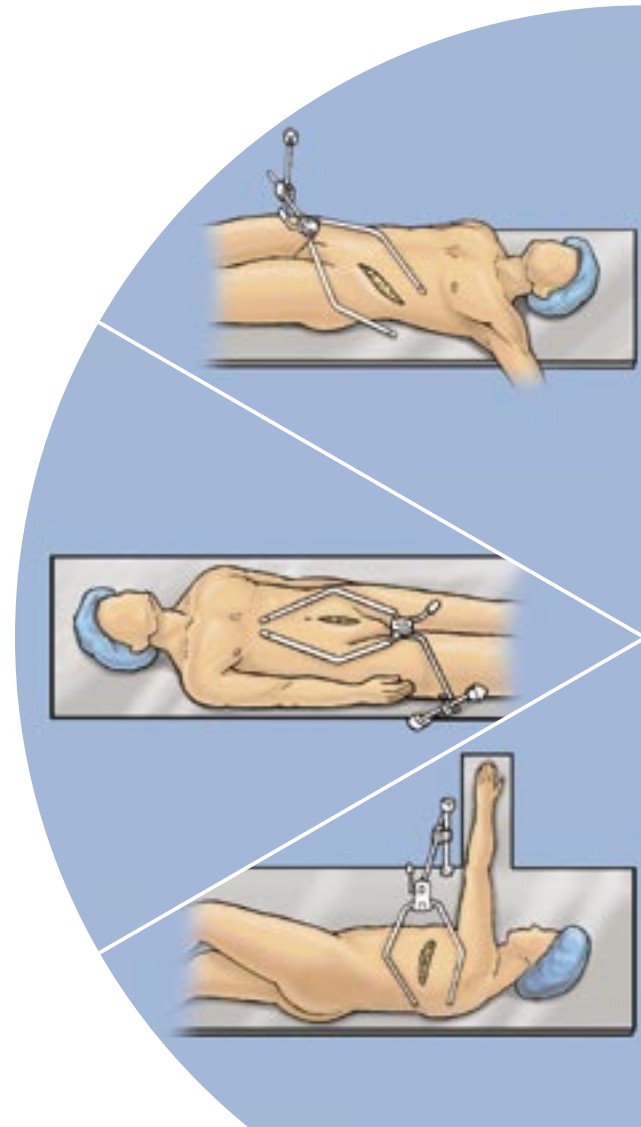

Use one arm. Use two arms. Take one arm away or use one of each. Choose the frame arm—before or during surgery—that helps maximize your surgical field.

Flexibility for Any Approach

Any approach. Any plane. Any position. Always low-profile.

The Omni-Flex Retractor System gives you complete surgical freedom.

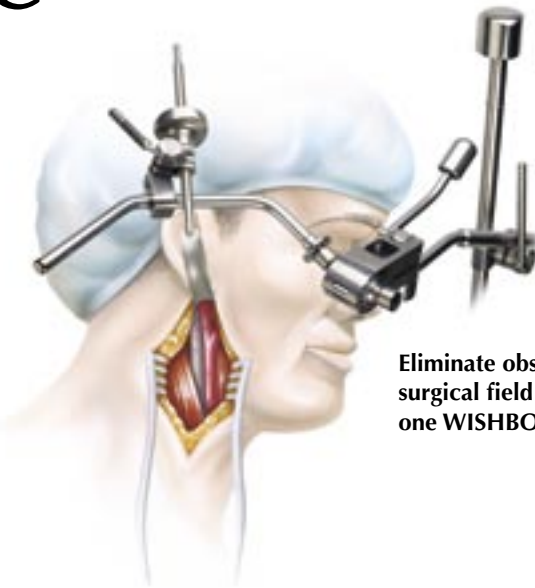

Ease-of-Use

Maximize Exposure Minimize Obstructions

Exchange an arm. Remove an arm. Open the field.

The Omni-Flex System easily exposes difficult anatomy no matter what your procedure demands.

Eliminate obstacles in the surgical field by using only one WISHBONE frame arm.

New SideSnap™ Clamp Technology Speeds Setup & Mid-Surgery Changes

Snap the clamp on the frame. Snap the blade in place.

Our new, patented SideSnap™ Clamps allow for quicker, simpler setup. Plus they are even stronger, enhancing the flexibility of the Omni-Flex System.

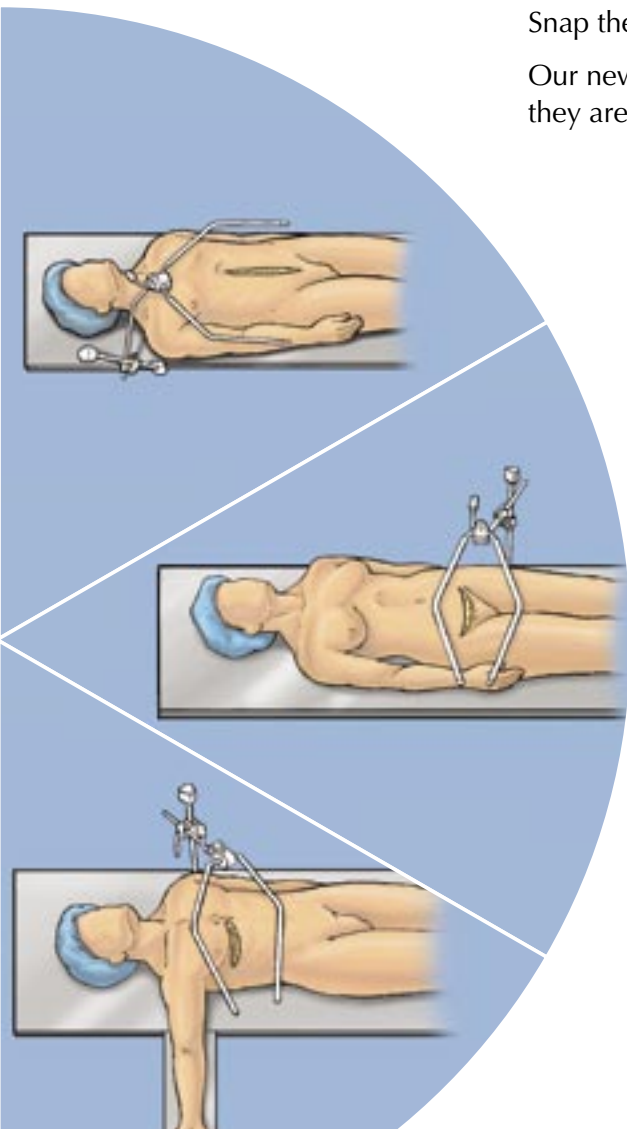

No Need to Feed Blade Shaft:
Quick blade attachment in one sweeping motion—with a simple snap from the side.

Strength

Strength for Stability with Every Patient

Any patient size. Any incision size. Always stable. The Omni-Flex System is designed to remain stable, so you always get the exposure you need.
