

# Omni-Flex™

Retractor System

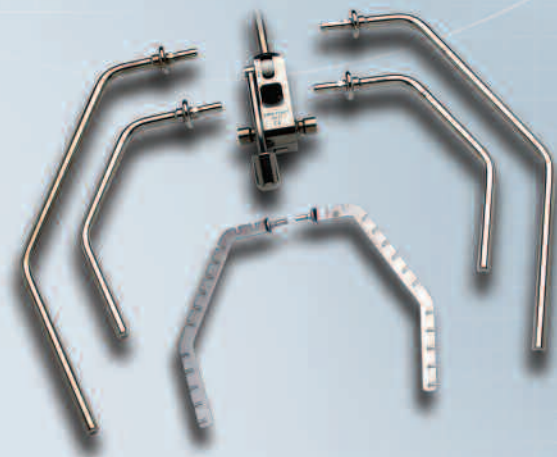

One System  
Any Specialty

## Easy-to-Use Flexibility

The Omni-Flex™ System lets you choose only those components you really need.

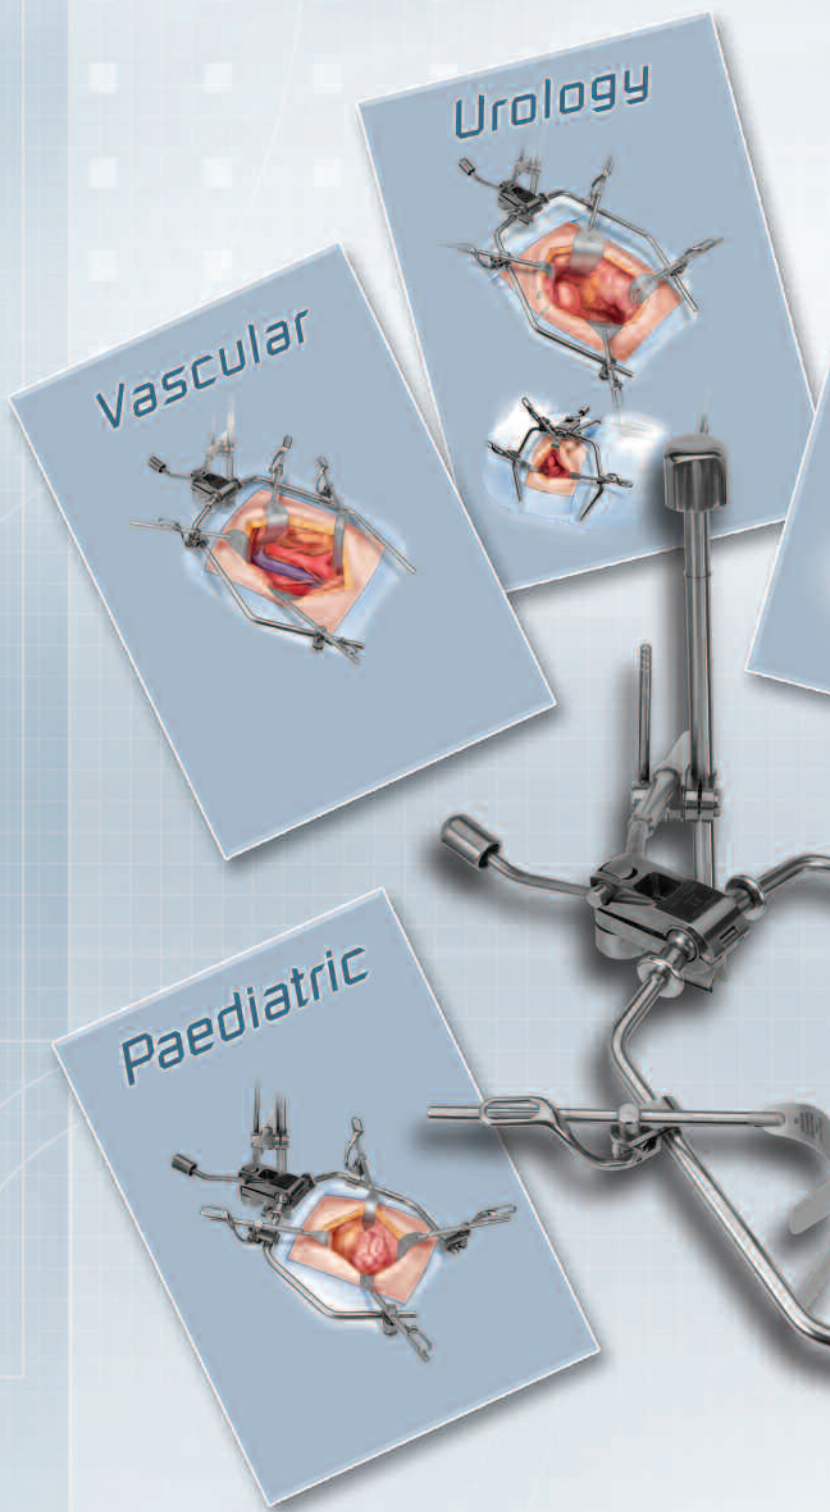

## Choose Your Best Exposure

With the Omni-Flex System, you can easily accommodate every specialty exposure need: small or large incisions in small or large patients. With this single Omni-Flex System and your choice of frame arms and blades, you are ready for any surgery.

## Choose the Blades You Need

With over 30 years experience in operating theatres worldwide, Omni-Tract® Surgical provides the tools you need for unparalleled exposure in your surgery: vascular, general surgery, urology, orthopaedic, bariatric and others.

## SideSnap™ Clamps for Faster Setup

Snap the clamp on the frame. Snap the blade in place. Our SideSnap™ Clamps allow for quicker, simpler setup.

## Focus First On Exposure

Position your blade in the wound first, then attach the SideSnap Clamp in one sweeping motion.

## Strength In Every Surgery

Whether your patients are large or small, whether your procedure is a total hip or total knee, the Omni-Flex System strength gives you confidence in every surgical situation.
